## WHY CHOOSE US?

We use state of the art equipment including specialist software to give fast and accurate results.

Our award winning consultants are all professionally qualified to undertake the work they do.

We know our subject well. Our staff are fully accredited expert witnesses and have achieved professional registration with the Engineering Council.

We are a totally independent consultancy. We don't sell other companies' products.

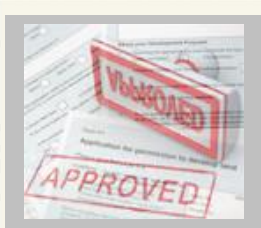

Our consultants charge solely for their time and technical expertise, giving you the peace of mind that the solutions we provide will be the most economical and suitable for your requirements.

“ WE WILL NEVER CHARGE FOR PROVIDING YOU WITH A QUOTE.

## WE PROVIDE ADVICE ON:

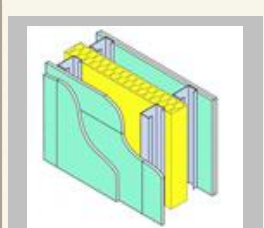

SERVICES

PLANNING

DESIGN

SURVEYS

Our business is able to combine the technical abilities of a large company with the price structure and response time of a small consultancy due to our lack of overheads.

### Noise & Vibration Monitoring

We have the experience & equipment to provide a solution for all your noise & vibration monitoring needs both short and long term. We can also supply noise and vibration monitoring equipment that has been fitted with remote download capabilities and automated SMS text alarm functions.

### Construction Noise

We have a long history of working on projects involving heavy plant & equipment where there are concerns over noise from construction & demolition works and in obtaining prior consent for these works to take place. We have a good understanding of most construction methods, and the appropriate options for noise control.

### Industrial & Commercial Noise

We are able to carry out assessments of noise affecting mixed industrial and residential areas using a variety of methods including: surveys, computer noise modelling and noise control design. Often new plant & machinery will be subject to planning conditions relating to noise which we can help you to discharge.

### Noise at Work

The purpose of the Noise at Work Regulations 2005 is to protect employees from noise induced hearing loss by limiting their exposure to noise in the workplace. We advise on controlling noise at the source, on mitigation, alternative working patterns, and the suitability of hearing protection.

### Expert Witness

We have senior technical staff and associate consultants who are registered experts who have provided expert opinion for both criminal and civil proceedings.

### Planning

Planning Authorities always consider noise from new developments. We are able to assess and advise on acceptability in line with the local authority's noise policy and also to suggest appropriate mitigation where necessary, helping you to avoid any expensive complications.

### Building Acoustics

We are able to provide advice at the design stage for any glazing requirements, services noise and construction elements when carrying out building works & redevelopment.
